LAVANYA R

Bengaluru, Karnataka | lavir2005@gmail.com | +91 91102 54542 | www.linkedin.com/in/lavanya-r05

PROFESSIONAL SUMMARY

B.E. Artificial Intelligence and Machine Learning graduate with hands-on internship experience in Machine Learning, NLP, backend development, microservices, and full-stack applications. Proficient in Python, NLP, machine learning, ASP.NET Core, Angular, PostgreSQL, and Docker. Experienced in developing practical AI/NLP solutions and scalable software applications. Seeking an entry-level AI/ML Engineer or Machine Learning Engineer role to apply strong technical and problem-solving skills to real-world AI applications.

TECHNICAL SKILLS

Programming Languages: Python, SQL, TypeScript, JavaScript, C++
AI, ML and NLP: Machine Learning, NLP, N-gram Modeling, Generative AI, Apache OpenNLP, NLTK, Scikit-learn, Pandas
Web and Backend: HTML, CSS, Next.js, Node.js, Angular, REST APIs, EF Core, Microservices
Data, Cloud & DevOps: PostgreSQL, MySQL, Supabase, AWS (RDS, VPC, IAM, Secrets Manager), Azure AI, Docker, GitHub Actions
Analytics: Power BI, Tableau

EXPERIENCE

Software Development Intern *Bengaluru, Karnataka*
PlaceValue.in June 2026 – August 2026

- Engineered REST APIs and microservices using ASP.NET Core, EF Core, and PostgreSQL for code-editor, order, cart, and payment workflows, with Docker-based deployment.
- Built Angular dashboards and QR-based warehouse/fleet systems for real-time inventory, vehicle tracking, trip assignment, and route monitoring.
- Co-founded and engineered an Agentic AI interview platform featuring autonomous LLM agent loops, RAG, vector embeddings (pgvector), conversational memory, and context-aware question generation for adaptive, real-time mock interviews.
- Built an end-to-end voice AI and automated evaluation pipeline using Gemini, OpenAI embeddings, Sarvam AI speech-to-text, FastAPI, and structured LLM scoring, enabling dynamic follow-up questions and personalized candidate feedback.

NLP Research Intern *Bengaluru, Karnataka*
LogiScope Technologies Pvt. Ltd. February 2025 - May 2025

- Built and evaluated n-gram language models using Apache OpenNLP for text analysis and sequence prediction, improving understanding of statistical language modeling techniques.
- Researched LLM architectures and fine-tuning techniques, gaining practical understanding of modern NLP workflows and transformer-based language models.
- Evaluated language-model performance across different configurations to understand their effectiveness for text prediction and language-processing tasks.

PROJECTS

Suvidha AI - AI-Powered Financial Assistance Platform *Bengaluru, Karnataka*
Next.js | Node.js | Supabase | Python | LLM APIs | NLP 2026

- Developed a multilingual, LLM-powered scholarship platform for opportunity discovery, eligibility checks, application guidance, and personalized assistance.
- Designed a centralized platform that streamlined the scholarship discovery and application workflow, reducing the need to search across multiple sources.
- Built an AI-driven eligibility matching system that helps users identify scholarships aligned with their academic profile and requirements, reducing manual effort in opportunity discovery.

Multilingual AI Chatbot for Financial Services *Bengaluru, Karnataka*
Python | Next.js | Node.js | Supabase | LLM and NLP APIs 2025

- Built a multilingual chatbot using LLM and NLP APIs for context-aware financial guidance in users' preferred languages.
- Implemented context-aware conversations that retained relevant chat history, reducing the need for users to repeatedly provide information, and making interactions more natural.
- Used Supabase for structured data storage and backend services, enabling efficient management of user and conversation data.

EDUCATION AND CERTIFICATIONS

B.E. in Artificial Intelligence and Machine Learning 2023 - 2027
SJB Institute of Technology (SJBIT), Bengaluru | VTU | CGPA: 8.91/10

NPTEL - Cybersecurity and Privacy (12 weeks), IIT Madras
Udemy - AI Agents & Workflows - The Practical Guide
